Abstract (en)
[origin: WO2019136502A1] The invention relates to an arrangement (1) consisting of a first pull-out guide (3a) for a movable furniture part (2) and a driver (4a) for a drive device (5) for moving the movable furniture part (2) in relation to a furniture body (6), in which: the driver (4a) comprises a driver projection (7) that can be actively connected to the drive device (5); a first fastening device (8) is provided with a part (8a) which is arranged on the driver (4a) and a part (8b) which is arranged on the first pull-out guide (3a), by means of which the driver (4a) can be fastened to the first pull-out guide (3a); one part (8a, 8b) of the first fastening device (8) is embodied as a pin (9), and one part (8a, 8b) is embodied as a pin-receiving element (10) corresponding to the pin (9); the pin (9) is positioned obliquely to the longitudinal extension (L) of the first pull-out guide (3a), and the pin-receiving element comprises an insertion channel (11) for the pin (9), which comprises a throat (E); the driver (4a) comprises a part (12a) of a second fastening device (12), which is embodied as a pin (9) or as a pin-receiving element (10), for optional fastening of the driver (4a) to a second pull-out guide (3b) which is substantially laterally reversed in relation to the first pull-out guide (3a); and the part (8a) of the first fastening device (8), which is arranged on the driver (4a), is arranged on the driver (4a) such that it is laterally reversed in relation to the part (12a) of the second fastening device (12), arranged on the driver (4a).
