Abstract (en)

[origin: WO2019137621A1] The present invention discloses an article for delivery of a fragrance. The article comprises or consists of a first carrier material comprising at least one first fragrance, a second carrier material comprising at least one second fragrance, wherein the article is adapted for sequential or simultaneous release of the at least one first fragrance and the at least one second fragrance, wherein mass transfer between the first carrier material and the second carrier material is inhibited or prevented. The present invention further provides the use of the article for delivery of a fragrance as air freshener or in an air freshener for home, toilet, cellar, wardrobes, dish wash, suitcase, handbags, automobile and mattress applications.
