Abstract (en)
[origin: WO2019138437A1] Described is a conveying system (T) of a cover (F), of the type comprising at least one open or partially open side so as to define an opening (A), for a production plant (1) of padded objects starting from said cover (F), of the type comprising at least one processing unit (300, 500, 900) of said cover (F), comprising a first conveying unit (100), comprising gripping means (103, 104) designed to grip said at least one side of said cover (F), designed for conveying said cover (F) from a first position towards a second position at said at least one processing unit (300, 500, 900) of said cover (F), and a second conveying unit (600), comprising gripping means (603, 608) designed for gripping said at least one side of said cover (F), designed for conveying said cover (F) from said second position to a third position, said gripping means (603, 608) of said second conveying unit (600) being configured so as to take said at least one side of said cover (F) in said second position, during the gripping of said at least one side of said cover (F) by said gripping means (103, 104) of said first conveying unit (100). The invention also relates to a plant (1) comprising said conveying system.
