Abstract (en)

[origin: WO2019135144A1] The invention relates to the use of at least one halogenated salt of tetraphenylphosphonium as a smoke-producing agent in a pyrotechnic composition intended to provide masking of an objective with respect to electromagnetic radiation in a given wavelength range. The invention also relates to a smoke-producing pyrotechnic composition comprising at least one halogenated salt of tetraphenylphosphonium.
