Abstract (en)

[origin: WO2019141863A1] The invention relates to a seat plate for an injector, comprising a plate-shaped main body having a first planar face, a second planar face and one or more peripheral end faces, an opening, which extends through the plate-shaped main body from the first planar face to the second planar face, and an insulating coating, which is arranged over the entirety of all of the peripheral end faces and, with the exception of at least one continuous region that is free of the insulating coating, is arranged over the entirety of one of the two planar faces of the plate-shaped main body, the plate-shaped main body consisting of an electrically conductive material.
