Abstract (en)
[origin: WO2019134768A1] The invention relates to a cable screw connection (1) comprising a passage opening (3) which extends in the axial direction for passing through a cable, comprising a socket (2), a clamping nut (4) which can be operatively connected to the socket in the axial direction, and a single- or multipart annular clamping element (6) which is arranged between the socket (2) and the clamping nut (4) for clamping the cable in the passage opening (3). The passage opening (3) is closed by a dust cover (9) prior to passing through the cable.
