Abstract (en)

[origin: WO202229033A1] The present invention relates to a device (4) for supplying to and/or controlling hydraulically operated components of a die casting machine (1), comprising a base block (5) with a main inlet opening (5a) and a main outlet opening (5b) for hydraulic medium, and also at least two different module components, which are selected from the group consisting of core-pulling modules (6), core-pulling-relief modules (13), booster modules (8), secondary movement modules (9), and vacuum modules, and which are fluidically connected to the base block (5). The present invention relates to a die casting machine (1) with such a device and to a method for supplying to and/or controlling hydraulically operated components of a die casting machine (1).
