Abstract (en)

[origin: CN212268016U] The utility model relates to a packaging device (1) for articles (40) or article groups. The packaging device (1) comprises at least one transport mechanism (7) for the input of an article (40) or group of articles (3) and comprises at least one first handling device (9) for the article (40) or group of articles. The first handling device (9) is designed to mount the at least one packaging blank (2) on the article (40) to form an assembly (5) and comprises at least one first inspection mechanism (11). The first inspection mechanism (11) is designed to identify incorrect fastening of the packaging blank (2) to the article (40) and/or to identify a missing, erroneous or defective packaging blank (2) and/or to identify an erroneous or defective article (40).
