Abstract (en)  
[origin: CN111946175A] The invention relates to a door handle arrangement (1), in particular an outside door handle arrangement for a vehicle having at least one moving vehicle element (2), comprising at least: a handle element (6) with a handle recess (6.1); a handle plate (3) at least partially covering the handle cavity (6.1); an actuating unit (8) which is arranged between the handle element (6) and the handle plate(3); and a carrier unit (9) having at least one sensor (9.2) and at least one switch (9.1) for opening the door lock (5), the carrier unit (9) being designed to unlock the door lock (5) upon detection of an object (O) located in a detection region (9.3) of the sensor (9.2), the actuation unit (8) being designed to be pressed against the switch (9.1) during manual actuation.
