Abstract (en)  
[origin: WO2019142139A1] A rolling bed (1) for substantially cylindrical smoking articles (A), each of which comprises at least two coaxial, substantially cylindrical segments (B, C) and a connecting strip (D), the connecting strip (D) extending tangentially from the segments (B, C) on which the strip (D) is positioned with an end preferably glued to the segments (B, C); the rolling bed (1) comprising a transporting surface (2) adapted to face a rolling portion (4) of a conveyor drum (3) for said smoking articles (A) and defining, with said conveyor drum (3), a rolling channel (5) adapted to transversely carry the smoking articles (A) along a rolling direction between an infeed station (I) corresponding to an infeed portion (2a) of the transporting surface (2) and an outfeed station (U) corresponding to an outfeed portion (2b) of the transporting surface (2); the rolling bed (1) comprises at least two independent rolling sectors (7) positioned side by side along a direction transverse to the rolling direction.
