Abstract (en)  
[origin: WO2019141708A1] The invention relates to a receiver device (1) in a vehicle, having a receiver system (2) and a receiver module (4) remote therefrom, wherein unidirectional or bidirectional high-frequency signals are received or emitted via at least one antenna (3), which is connected to the remote receiver module (4), wherein these signals are converted in the remote receiver module (4) and forwarded to the receiver system (2), wherein the receiver system (2) can be connected in a wireless or wired manner to a mobile device.
