Abstract (en)

[origin: WO2019141830A1] The invention relates to a pallet for transporting goods or materials. The pallet has a body (12); a bar (16), releasably attachable to the body and movable between a transport position, and a connection position; and a fixing (18), configured to releasably secure the position of the bar and/or releasably secure the pallet to an adjacent pallet. The bar and clip function to enable pallets to be connected together. The invention further resides in a building (100), such as a dwelling, formed by a plurality of interconnected bodies, bars and clips of a plurality of pallets.
