Abstract (en)  
[origin: WO2019141736A1] The invention relates to an apparatus (100) for selling goods (161), comprising at least two storage areas (111, 112) in which respectively a temperature different to the other storage areas can be adjusted and/or regulated within a respectively associated temperature range, and which are respectively designed for the storage of goods (161), an automated handling system (120) by means of which goods (161) can be removed from each of the storage areas (111, 112), and a dispensing device (130) in which goods (161) can be made available for removal, the apparatus (100) being designed such that selected goods (161) are removed from the storage areas (111, 112) by means of the handling system (120), and following the release of said goods, the goods are provided for removal in the dispensing device (130). The invention also relates to a system comprising at least one such apparatus, and to a method for operating such an apparatus (100).
