Abstract (en)
An aerosol delivery device. The aerosol delivery device comprising: a passive aerosol generator, configured to generate an aerosol from an aerosol precursor; a vapour generator, configured to generate a vapour from a vapour precursor; a first airflow path, which extends from a first inlet of the aerosol delivery device through the vapour generator, through the passive aerosol generator to an outlet of the aerosol delivery device; and a second airflow path, which extends from a second inlet of the aerosol delivery device through the passive aerosol generator to the outlet.
