Abstract (en)
[origin: EP3741907A1] A laundry appliance (10) includes a cabinet (14) defining a front opening (18) in a front panel (58). The front opening (58) is defined by a lip (374) having a curved edge (378). The lip (374) defines a plurality of apertures (386) spaced-apart around the front opening (18). A tub (20) is disposed within the cabinet (14). The tub (20) defines an access opening (90) aligned with the front opening (18). A drum (22) is disposed within the tub (20). A bellows assembly (42) extends between the cabinet (14) and the tub (20). The bellows assembly (42) includes a projection (382) coupled to the curved edge (378) of the cabinet (14). A deflector (74) has a rim (358) and a chute (362), wherein the chute (362) extends toward the drum (22). The rim (358) is configured to snap-fit over the projection (382) of the bellows assembly (42). The rim (358) includes a plurality of hooks (390) where each hook (390) is configured to extend through an aperture (386) and interlock with the cabinet (14).
