Abstract (en)
[origin: WO2019115740A1] The present invention relates to a football board game comprising: 1) an element representing a football field comprising a rectangular grid subdivided into bands, each band being in turn subdivided into boxes and comprising action boxes having at least one symbol associated with a possibility of game action and/ or neutral boxes not having any symbol associated with a possibility of game action; 2) a plurality of player pieces, each player piece having at least one value associated with at least one playing parameter of the player to which it refers; 3) a piece representing a football; 4) at least one device capable of providing from time to time a random value to be combined with a playing parameter of at least one player piece so as to determine the outcome of at least one type of game action; and 5) a set of game rules. The game according to the invention is able to reproduce a very large number of the situations which typically arise during a football match, also depending on specific and varied parameters, which may also be related to real football players and teams.
