Abstract (en)

[origin: WO2019143289A1] The invention relates to a bit holder, having a magnetic core (5), which attracts bits (1) into holders (2). The magnetic core (5) of the bit holder is singular with attraction surfaces exposed to bits located in the holders, is substantially enclosed in a housing (12), which includes the holders for the bits and has one or more openings (13), through which the magnetic core (5) is openly exposed outwards, towards the surroundings.
