Abstract (en)

[origin: WO2019145769A1] The present invention provides a household appliance and a method and system for voice controlling the household appliance. The household appliance includes a control device and a voice device, a wireless communication module in a wireless communication connection to a cloud server is disposed on the control device, and the voice device includes a voice collecting module and a voice output module. The method includes the following steps: collecting, by using the voice collecting module, a voice signal input by a user; sending the voice signal to the cloud server by using the wireless communication module for identification; receiving, by using the wireless communication module, a control instruction and instruction confirmation information that match the voice signal and that are fed back by the cloud server; outputting the instruction confirmation information in a voice signal manner by using the voice output module, and asking for feedback information of the user; and instructing, according to the feedback information, the control device whether to execute the control instruction.
