Abstract (en)  
[origin: RU2736157C1] FIELD: construction.SUBSTANCE: invention relates to a rail fastening system for securing rail at lower track structure. Rail fastening system for fastening rail (2) on lower track structure (3), preferably on ballast-less track, includes at least one fixing element (6) for mounting rail (2) on lower track structure (3). At that, fixing element (6) has angular guide plate (8), which is adapted so that in mounted state to remove transverse forces from rail (2) in track lower structure (3), and thrust element (11), which is adapted to fit tightly butt-end to angular guide plate (8) and to be geometrically closed in recess (3a) of lower structure (3) of track.EFFECT: as a result, it becomes possible to implement height compensation in a structurally simple manner.14 cl, 2 dwg

Abstract (de)  
Schienebefestigungssystem zur Befestigung einer Schiene (2) auf einem Untergrund (3), vorzugsweise einer festen Fahrbahn, umfassend zumindest ein Halteglied (6) zur Montage der Schiene (2) auf dem Untergrund (3), wobei das Halteglied (6) aufweist: eine Winkelführungsplatte (8), die eingerichtet ist, um im montierten Zustand Querkräfte von der Schiene (2) in den Untergrund (3) abzuleiten; und ein Schulterteil (11), das eingerichtet ist, um im montierten Zustand stoßbündig an der Winkelführungsplatte (8) anzuliegen und formschlüssig in einer Ausnehmung (3a) des Untergrunds (3) zu liegen.
