Abstract (en)  
The present invention proposes a boss gully trap. The boss gully trap comprises a body comprising an open top, a closed end, one or more inlets configured to be connected to pipes and/or fittings, and an outlet configured to be connected to a pipe and/or a fitting. A trap configured to be mounted in the body is provided, the trap comprising an inlet; and an outlet. When the trap is mounted in the body, the distance between the closed end of the body and the inlet of the trap is about 5 mm to about 10 mm.
