Abstract (en)

[origin: WO2019149626A1] The present invention relates to the detection of resistances of harmful organisms to pest control agents. The subject matter of the present invention is a method and a system for the detection and acquisition of resistances. The invention further relates to the use of the system according to the invention for establishing a resistance map, in which information regarding the resistance of one or more harmful organisms to one or more control agents is recorded for a field or a plurality of fields for the cultivation of cultivated plants.
