Abstract (en)

[origin: WO2019149631A1] The invention relates to a securing device (10) for securing a panel (2) of a drawer (1) to a panel structure (4a, 4b). The securing device (10) has at least one retaining element (101, 201) which is arranged on the panel side and at least two catching devices (100, 200) which are arranged on the panel structure side. The catching devices (100, 200) are mechanically coupled together in a functionally active manner for locking purposes such that the catching devices can be locked together to the at least one retaining element (101, 201), and the two catching devices (100, 200) are functionally uncoupled in a mechanical manner for unlocking purposes such that the unlocking process is carried out by separately actuating each catching device (100, 200).
