Abstract (en)  
[origin: WO2019149732A1] The present invention relates to a system and method for an interactive board game consisting of game equipment. The present invention further comprises a board game management device (PL) having a touch screen (Ec) which comprises a plurality of antennas, several antennas (Ant1a, Ant1b, Ant1c to Ant8a, Ant8b, Ant8c) being arranged at the periphery of the board game management device, each item of game equipment (Ca1, Ca2, Ca3, Ca4, Ca5, Ca6, P1, P2, P3, P4, De) comprising at least one radio identification tag which is activated by an antenna of the board game management device when the equipment is in an area comprising the antenna, said radio identification tag outputting in response a signal received by the antenna and transferred to the board game management device, and the board game management device comprising a means for displaying (Ce) information for board game players who play according to the position of the game equipment on the screen or near the antennas arranged at the periphery of said device.
