Abstract (en)
[origin: WO2019161995A1] The invention relates to a high-pressure cleaning device (10) having a device housing (14) in which an electric motor (64) and a pump (68) driven by the electric motor (64) are arranged, and having at least one rechargeable battery (112, 114) for supplying energy to the electric motor (64). According to the invention, in order to further develop the high-pressure cleaning appliance (10) in such a way that it has a higher power, the high-pressure cleaning appliance (10) has at least two rechargeable batteries (112, 114) which are serially connected to one another.
