Abstract (en)
[origin: WO2019150045A1] The present invention relates to a novel solid, porous material made of fibres, which material is recyclable, its method of preparation and its creative use (educational and practical), in particular in the sector of arts and of applied arts (teaching and artisanal practice). This novel material can also form semi-finished products for both acoustic and thermal, bespoke insulation, whilst providing a medium with a surface and morphology conducive to creation (functional painting paper).
