Abstract (en)

[origin: WO2019145066A1] The invention relates to a method for operating a radar sensor system having a plurality of radar sensors (12, 14) operating independently of one another in a motor vehicle (10), characterized in that the radar sensors (12, 14) are synchronized with respect to their transmission times and transmission frequencies in such a way that two radar signals whose frequency interval is less than a certain minimum frequency interval are at no time simultaneously transmitted.
