Abstract (en)
[origin: WO2019149488A1] A control bus (165) permits the transmission of a message (205) of a defined message length. A method (300) for transmitting information on the control bus (165) comprises the steps of transmitting a message (205), which comprises a first (210) and a second field (215); the first field (210) comprising a variable reference to a type of information; and the second field (215) comprising information of the type of information to which the first field (210) makes reference.
