Abstract (en)
[origin: EP3747829A1] The invention relates to a fuel dispensing unit (1) for refueling vehicles. The fuel dispensing unit (1) comprises an underground tank for holding fuel, a fuel conduit (15) for transporting the fuel, the fuel conduit (15) extending between the underground tank (7) and a hose connection (11), a pump (8) arranged on the fuel conduit (13), the pump (8) having a suction side (S) and a pressure side (P), an additive tank (14) for holding additive, and an additive conduit (15) for transporting the additive, the additive conduit (15) extending between the additive tank (14) and the fuel conduit (13). The invention also relates to a method for handling a fuel dispensing unit (1).
