Abstract (en)  
[origin: JP2020202176A] To provide a heating device that can maintain the design, is easily assembled, and has a cost-effective heating element. SOLUTION: A heating element 12 includes fibers 13a and 13b of a heat conductive material made of silicon carbide. In an upper region of the heating element 12, the fibers 13a and 13b are arranged to extend in parallel as individual fibers or as yarns formed by spinning or twisting the fibers. Further, the fibers 13a and 13b extend between a left side connecting contact 18a and a right side connecting contact 18b over a shortest path. SELECTED DRAWING: Figure 1

Abstract (de)  
Eine Heizeinrichtung, wie sie vorteilhaft in einem Kochfeld eingebaut sein kann, weist ein flächiges Heizelement und eine Halteeinrichtung für das Heizelement auf. Das Heizelement weist Fasern zum Betrieb als Widerstandsheizler auf, wobei die Fasern einen Durchmesser von weniger als 50 µm aufweisen und aus SiC als Heizleitermaterial bestehen.
