Abstract (en)

[origin: WO2019154750A1] The invention relates to a bracket (10) for a shelf, wherein the bracket (10) has a basic body (14), which can be mounted on a rack post (12) of the rack, and a contacting element (16), wherein the basic body (14) can be mounted on the rack post (12) in at least two oblique positions, wherein the contacting element (16) has at least one contact (22), wherein the contacting element (16) can be arranged, in each of the oblique positions, in a contacting position (24) on the rack post (12), in which position the contact (22) has an electrically conducting connection with the electric conductor (20) of the rack post (12), wherein, to mount the basic body (14) on the rack post (12), the basic body (14) and the contacting element (16) can be pivoted relative to one another in one of the oblique positions. The invention further relates to a system (32) having such a bracket (10).
