Abstract (en)
[origin: WO2019149865A1] The invention relates to a wall hook (1) comprising a hook element (4) which is placed on a screw shaft (5) and which has a screw shaft receiving area (9) that at least partly surrounds the screw shaft (5), wherein when the screw (2) is screwed into a screw hole (23) in an anchoring base (26), the screw receiving area reaches the screw hole (23) and/or the anchoring base (26) and holds the hook element (4) on the screw hole (23) and/or on the anchoring base (26) in a rotationally fixed manner such that the hook element (4) does not rotate together with the screw (2). The invention allows a continuous spacing adjustment between the hook element (4) and the anchoring base (26).
