Abstract (en)
[origin: WO2019155340A1] Label (1) having an upper surface and a lower surface (3) provided at least partially with adhesive, which label (1) comprises at least one seal (5) defined by at least three incisions (t1, t2, t3) which connect the upper surface with the lower surface (3) of the label (1) and also define an appendix (6) that protrudes towards the inside of the seal (5) and is joined to a portion (1a) of the label (1) external to the seal (5), wherein the lower surface of the seal (5) is provided at least partially with adhesive and the lower surface of the appendix (6) is substantially free from adhesive, so that the appendix (6) is suitable to be torn from the seal (5) when the label (1), applied to a surface (2), is lifted from this surface (2). The present description also relates to a sheet (2) and a container comprising said label (1).
