Abstract (en)
[origin: WO2019156950A1] A lighting fixture appears as a skylight and is referred to as a skylight fixture. The skylight fixture (10) has a sky-resembling light assembly (14) and a plurality of sun-resembling light assemblies (16). The sky-resembling light assembly (14) has a sky-resembling optical assembly and a sky-specific light source, wherein light from the sky-specific light source exits a planar interior surface of the optical assembly as skylight light. The plurality of sun-resembling light assemblies (16) are arranged adjacent one another and extend downward from a periphery of the sky-resembling light assembly (14). Each of the plurality of sun-resembling light assemblies has a sun-resembling optical assembly and a sun-specific light source, wherein light from the sun-specific light source exits a planar interior surface of the sun-resembling optical assembly as sunlight light.
