Abstract (en)

[origin: WO2019149331A1] The present invention relates to a system for monitoring physical movements of a user, the system comprising: a detection unit configured for receiving a signal obtained by a sensor device representative of a sensed muscular activity, detecting or evaluating, if present, in said received signal, one or more inexpedient muscular activities (IMA). The invention also relates to a method for monitoring a physical movement of a user.
