Abstract (en)
[origin: CN112080833A] The invention relates to a cone warping machine and a cone warping machine operation method. The cone warping machine (1) is provided with a warping roller (2) and a warping table (3) arranged beside the warping roller (2), a warping reed (5) used for yarn input is arranged on the warping table, the warping roller (2) and the warping table (3) can move relative to each other, and the cone warping machine (1) is provided with a mechanical arm (8). According to the invention, the mechanical arm (8) of the cone warping machine (1) has at least one means for actuating the warp slivers (9). The invention also relates to a method for operating the cone warping machine (1), comprising the following steps: moving the warping roller (2) of the cone warping machine (1) and the warping table (3) of the cone warping machine (1) relative to each other until the warping table (3) faces a warping start zone (6) of the warping roller (2), receiving a warp sliver (9) from the warping table (3) by means of the mechanical arm (8) of the cone warping machine (1), and the warp sliver (9) is fixed on the warping roller (2) through the mechanical arm (8) in the warping start zone (6).
