Abstract (en)
A storage container (100) for a refrigerator and a refrigerator are provided. The storage container includes: a container body (110) comprising a receiving cavity (111), a bottom wall (112), and a front wall (113) connected to a front side of the bottom wall (112) and extending upward, wherein the front wall (113) comprises a front raised edge (114) protruding toward the receiving cavity (111) to be engaged with at least one decoration member (120) extending along the front wall (113). The container body of the container provided by the present invention may be used in conjunction with the decoration member, or may be used alone, facilitating improvement of compatibility of the container body of a manufacturer.
