Abstract (en)
[origin: WO2019141300A1] The invention relates to a device (1) for training for a stroke sport, in particular a court sport, in particular tennis. The device comprises a training handle means (2), which substantially corresponds to a playing handle means of a playing means of the corresponding stroke sport, at least one resilient whip means (3), in particular a resilient whip rod (4), the whip means being formed in the context of a head means of the playing means of the corresponding stroke sport, in particular having a flexible whip means end piece (11), the whip means being attached to the training handle means in the context of a head means of the playing means of the corresponding stroke sport, the whip means comprising physical properties which correspond to the playing means of the corresponding stroke sport, in particular size and/or modulus of elasticity and/or weight, which properties are designed to be adapted to the requirements of the respective stroke sport and/or the playing ability of a respective player to be trained.
