Abstract (en)

[origin: WO2019158146A1] The method and the apparatus serve for air extraction (100) in the area of a heating press (200). Extracted air is fed to at least one exhaust-air treatment device (140). In the area of the device, the extracted air is modified in terms of at least one parameter. It is intended in particular to use a tyre heating press (200) as the heating press.
