Abstract (en)

[origin: CA3088119A1] The rotary-percussive hydraulic drill (2) comprises a body (3); a fitting (15); a striking piston (5) configured to strike the fitting (15); an impact piston (13) having a front face (18) facing the fitting (15) and a rear face (19) facing a rear wall (21) of a cavity (14) which receives the impact piston; and a main hydraulic supply circuit comprising a high-pressure fluid supply line (9) and a low-pressure fluid return line (11). The body (3) and the impact piston (13) define a first control chamber (22) which is permanently connected to the high-pressure fluid supply line (9) and configured to urge the impact piston (13) forwards, and a second control chamber (25) which is configured to urge the impact piston (13) forwards and permanently connected to a low-pressure accumulator (26) which is connected to the low-pressure fluid return line (11).
