Abstract (en)

[origin: WO2019158869A1] Disclosed is a cherry picker (1) comprising a chassis (2), a heat engine (4), a starter (5) and a starter actuator (62) for said engine (4), a platform (8), means (9) for lifting the platform (8) that include a lifting arm (91), a control console (10) that includes a control unit (26) for the lifting means (9), a drive unit configured to control at least the arm (91) according to the data input into the control console (10), a member for powering the drive unit (11), a member (12) for activating/deactivating the control unit (26) for the lifting means (9), said member (12) being mounted to as to be movable between an inactive position, in which the control unit (9) for the lifting means (9) is deactivated, and an active position. In the working configuration, which corresponds to the raised position of the arm (91), the cherry picker (1) has an operating mode in which, when the heat engine (4) is in a stopped state while being powered, the drive unit (11) is configured to control the start of the heat engine (4) by means of the activating/deactivating member (12) without the actuator (62) for the starter (5) being actuated.
