Abstract (en)
[origin: CA3094803A1] The invention relates to a high-voltage transducer (1) having a housing (2), which physically encloses at least one electric measuring device (3) and an insulating gas (4), and to a method for measuring with the high-voltage transducer (1). The insulating gas (4) is clean air, via which electrical insulation in the housing (2) of the high-voltage transducer (1) is carried out.
