Abstract (en)
[origin: WO2019158802A1] There is provided a method in a network element of a wireless network, the method comprising: obtaining, from a controlling entity of the wireless network, trajectory information on at least one user equipment, UE, the movement of the at least one UE being controlled by the controlling entity within a geographically restricted area, the trajectory information indicating a planned trajectory of the at least one UE (210); obtaining radio channel measurement information regarding the planned trajectory (220); and predictively controlling, based at least on the trajectory information and the radio channel measurement information, at least one of a trajectory of the at least one UE, one or more transmission parameters of one or more signal transmissions (230).
