Abstract (en)

A leaning vehicle (1) includes a base member (20), an upper arm (21), a lower arm (22), a first support member (23), a second support member (24), a first wheel (6L), a second wheel (6R), and a steering operation member (8). The upper arm, the lower arm, the first support member, the second support member constitute a parallel link mechanism (70). The first wheel is movable integrally with the first support member in a turning direction of the base member. The second wheel is movable integrally with the second support member in the turning direction of the base member. According to turning of the base member by operating the steering operation member, all of the upper arm, the lower arm, the first support member, the second support member, the first wheel, and the second wheel turn around a turning center of the base member.
