Abstract (en)
[origin: CN112095180A] The invention relates to a circular comb (7) and a combing head (1) for a combing machine, the circular comb (7) having a combing card clothing (13) and a circular comb axis (6), the circular comb comprising a card clothing carrier (10) and at least one circular comb carrier (9). The card clothing carrier (10) is held on a circular comb carrier (9), and the circular comb carrier (9) is fastened to the circular comb shaft (8) by means of a connecting screw (24). A cover plate (25) is attached to each end of the circular comb carrier (9) as viewed in the direction of the circular comb axis (6). An insertion rail (31) is arranged between the circular comb carrier (9) and the circular comb shaft (8). At least one adjusting device is arranged between the circular comb carrier (9) and the insertion rail (31) in each end region (27) of the circular comb carrier (9) in order to adjust the distance (A) between the insertion rail (31) and the circular comb carrier (9).
