Abstract (en)

[origin: CN112095317A] The invention relates to an ironing device comprising an ironing plate (5) having a face, referred to as the front face, against which the laundry to be ironed can be placed, and an opposite face, referred to as the back face, in order to treat the laundry by means of an ironing and/or ironing tool (31), characterized in that the ironing plate (5) is designed as a flat plate (6). The back surface of the plate (5) includes an upper portion (51B) connected to the front surface and a lower portion (51A) independent of the upper portion (51B), the upper portion (51B) of the back surface and the front surface being pivotally mounted on the base (1) between a first position in which the upper portion (51B) is aligned with the lower portion (51A) and a second position in which the upper portion forms a non-zero angle.
