Abstract (en)  
Strip adapted for sealing a gap (9) between two adjacently arranged formwork panels (8), said gap (9) being delimited by side walls (8b) of the respective panels (8). The strip (10) comprises a body (11) with two flanges (15), each of which is configured for being housed in the gap (9) and pressing against the side surface (8b) of the corresponding panel (8), the strip (1) further comprising arms (12) extending on both sides of the body (11), each of which is configured for being supported on an upper surface (8a) of the corresponding panel (8), the arms (12) and the two flanges (15) being configured for holding the strip (10) against the corresponding panels (8) and for sealing the gap (9) preventing concrete from entering same, generating a respective longitudinal sealing area (A, B, C) against the respective surface (8a, 8b) of the corresponding panel (8).
