Abstract (en)  
The present invention relates to a door (4) for a household appliance, particularly for an oven, comprising a plurality of door panes (5, 6, 7) spaced apart each other, a pair of pane holding columns (10) provided on opposite sides of the door, each pane holding column (10) having at least one guiding channel (102) configured to guide an edge portion (13) of the associated door pane (5, 6, 7). In the invention, the door (4) further comprises at least one retaining part (11), which is being attached to the guiding channel (102) in order to retain at least a part of the edge portion (13) of the associated door pane (5, 6, 7) in a firmly manner.
