Abstract (en)

[origin: WO2019162558A1] According to one feature of the present invention, a track assembly is created for an all-terrain vehicle equipped with tyres, which track assembly comprises at least two track plates (3), each of which has a body (6), which is dimensioned to extend across the width of a tyre (1), and guide plates (4), which are oriented from the body (6) in such a way that they can be arranged over the edge of the tyre (1) and to the sides of the tyre (1). There are lugs (7) at each end of the track plate (3), which are arranged transversely to the length of the track plate (3) on each side of the track plate (3), in each of which lugs (3) there is a hole for a link (11), which joins the track plates (3) together in order to form an entire track. In the track assembly is a link (11), which comprises a link body (12), which has length and which link body (12) comprises, at at least one end, two lugs and between them a slot, and in the lugs are holes (13) for pins (14), pins (14), and a groove (9, 10) transverse to the length of the link body (12) and parallel to the holes (13), on the part of the link body (12) between the lugs, on at least one side of the link body (12).
