Abstract (en)
[origin: WO2019158881A1] The present invention relates to a glass-ceramic article comprising at least one substrate, such as a plate, made of glass-ceramic, said substrate being coated in at least one zone with at least one enamel coating, such that: 1) the enamel has a 60° gloss value of less than 40; 2) the percentage of enamel coverage in the area coated with the coating is between 40 and 80%; and 3) the enamel preferably 3a) is free of pigments in the form of particles of mica or aluminium oxide or silica, which are coated with metal oxides or combinations of metal oxides, and 3b) has a roughness Ra greater than or equal to 0.4 µm and/or a lightness L * greater than 50.
