Abstract (en)

[origin: WO2019162042A1] Arrangement for electroless metallization of a target surface (3) of at least one workpiece (2) comprising - a container (5) for receiving a metallization solution (7) - an inlet (8), arranged in the bottom (6) of the container, for the metallization solution (7), - an outlet, arranged on the upper side of the container (5), for the metallization solution (7), - a mount (11) for mounting (11) the at least one workpiece (2), wherein the mount is arranged movably in relation to the container (5) in at least two dimensions by means of a moving device (13).
